Standards	Speed	Frequency	Range	Compatibility	Popularity
802.11a	Up to 54 Mbps	5 GHz, less crowded band with less interference	Limited. Indoors no more than 30m; outdoors no more than 60m unless external antenna is added to the device to amplify the radio signal	Limited. Not compatible with 802.11b and 802.11g	New standard. Less common network since 802.11a does not satisfy the telecom regulation of some countries
802.11b	Up to 11 Mbps	Crowded 2.4 GHz band, interference could occur with other 2.4 GHz devices	Good Indoors up to 50m; in open space up to 150m. External antennae can be applied to amplify the radio signal	Compatible with 802.11b and 802.11g only	Most common wireless network so far, satisfies the telecom regulation of most of the countries
802.11g	Up to 54 Mbps	Crowded 2.4 GHz band, interference could occur with other 2.4 GHz devices	Good Indoors up to 50m; in open space up to 150m. External antennae can be applied to amplify the radio signal	Compatible with 802.11b and 802.11g only	New Standard; rapid market growth with the demand of high speed; satisfies the telecom regulation of most countries
